DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3,7-15 rejected under 35 U.S.C. 102(b) as being anticipated by WO 01/87671.

Regarding claims 1-3,7-15 WO '671 discloses applicant's prior invention with which applicant is well familiar. Please see the crash attenuation system in the several drawing embodiments. Note the hydraulic cylinder at 6,23 the pivotable wheels at 4,43, the damper at 4 and resilient means at 52.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO '671 in view of Albertini et al. and Mercier et al. or Kornhauser.

Regarding claims 4-6 WO '671 lacks a specific description of the hydraulic cylinder 6 using a medium which can be evacuated.

The references to Albertini et al. is relied upon to show this and for a teaching in column 1 lines 14-18 that it is known that pneumatic and hydraulic absorbers are used in crash attenuation systems, meaning that one may be substituted for another dependent upon costs, interchangeability of different trailers, and weight factors. The references to Kornhauser and Mercier et al. are relied upon for similar teachings.

One having ordinary skill in the art at the time of the invention would have found it obvious to have made this modification to the cylinder 6 in WO '641 for at least these reasons.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
